

New release Notice

7 models added to the CC Holder for robots

Dear Customer,

We are pleased to introduce the 7 new models added to the lineup of CC Holder for robots, which include screw fixing type.

For the installer, the newly added cable mount shape holder gives greater degree of flexibility in the size of mounted objects than ever.

CC holder for robots is designed to be installed to collaborative robots, industrial robots or aluminum frames for reducing bending or twisting movements of the cables or hose. We hope the enlarged lineup will help you more.

Thank you for your continued support in the future.
